### About This Game

Mine Seeker is a game of wits, speed and a little luck. A new puzzle game where your goal is to clear all the tiles, except the ones that have a mine. If a tile has a numbered space, that indicates how many mines are adjacent to that tile. This allows you to clear the tiles while trying to figure out where the mines are. However you are also timed and must be quick in figuring out where the mines are to avoid exposing one and making it explode.

With 180 fun and addicting levels with increasing difficulty, its sure to keep you guessing for a long time. A scoring system that keeps track of your scores and number of stars for each level. There is also a quick play for a more casual environment that lets you select a difficulty and is not timed. Don't forget about the 24 achievements you can earn.
