

This is a placeholder. The article you view when visiting this blog post is "How to Overcome Writer's Block". You can read the body of the article here: If you've ever been afflicted with writer's block, you'll know it's no laughing matter — it can impede your writing for days, weeks, or even months. And while it's tempting to just ignore the problem and hope that it goes away, writer's block is one of those pests that requires active extermination. It can be hard to get motivated if you feel like you're not getting anywhere with your writing, but don't let that get in the way of getting back to work. Even though writer's block often strikes without warning, there are some things you can do to get past it. 1. Assess Your Situation First, take stock of your current situation. Write down what you're currently working on, along with the specific problems that are weighing down your progress. Ask yourself what you don't understand or why things are taking so long, and ask yourself how each step might affect the others in terms of continuity and focus. Once you've outlined everything you do know, it's time to see what you don't know. Write down your current problems, but also consider how they might relate to each other. For example, if you're struggling with a certain scene because the characters are underdeveloped, the overall pacing is off, or there's too much dialogue, there may be one common obstacle that could be causing all these issues. 2. Visualize Your Story or Scene As writers, we often have a hard time seeing stuff clearly when we write—even if it's fiction. Luckily, there are some techniques that can help you overcome this limitation and bring yourself into the story so that your vision is clear enough for ideas to flow freely. One of these techniques is called mental visualization. In this type of writing, you write out a brief description of the scene or story in your mind, describing everything you can see and hear. By doing this, you're able to recognize any potential pitfalls before your brain starts adding things it might otherwise forget. Sometimes it can also help to write what you already know about the setting, characters, or plot in order to keep the idea fresh in your mind. This is especially helpful when you're stuck on a problem spot because it might be too hard for you to actually envision the scene in question until it's coming together correctly in your head. 3. Find the Conflict Conflict is one of the cornerstones of any story. It's what gives your characters a reason to act, gives your plot purpose, and makes your readers want to keep turning the pages. It's also what keeps you in the driver's seat when it comes to writing—the more conflict in your story, the more likely it is that you'll have trouble getting motivated to write out what happens next. This is especially true when there are too many problems or too little conflict for your characters to overcome or when you have no idea how they're going to get out of their current predicament .
